

The all-rounder for daily use behind single- and multi cells-with a wide range of functions!

Gigaset S700H PRO

The new S700H PRO - developed to provide optimum support for everyday working life. The large 2.4" TFT display dominates the disinfectant-resistant surface of the handset and fits comfortably in the hand. The excellent battery life, with up to 320 hours standby, makes the S700H PRO the perfect companion for everyday work. The high-quality surface that makes the handset scratch- and disinfectant-resistant, protects the easy-to-read keypad. Business functions such as the hotel option, the separately programmable alarm-button, the IP40 protection class and the audio profiles that can be selected via a separate key make it easy to use in professional work environments. It can thus be individually adapted to the user's needs. The handset offers Bluetooth® 4.2 and an integrated 3.5mm jack connection to handle both cordless and corded headsets. The handset is optimised for use with all professional Gigaset DECT systems. In addition, the S700H PRO can be used with other CAT-iq & GAP compatible base stations in single and multi-cell environments.
